

## Stewardship Lab at The Battery

Join us for an engrossing exploration of environmental management and park conservation, working with our staff here at The Battery to maintain our public green space and grow food for donation to local hunger relief organizations.

Students will primarily work on our half-acre urban vegetable farm and perennial forest farm, with occasional opportunities elsewhere in the park. Activities will vary from week to week depending on the time of year and particular needs of the season, and may include soil preparation, planting, harvest, pruning, propagation, pest management, composting, seed saving, growth surveys, and more.
